## Mitratel (MTEL IJ)

### Resilient Growth and Strategic Advantages Amid Telco Consolidation

- We project +7% yoy FY24 revenue growth, with a positive medium-term outlook, demonstrating resilience amid ongoing telco consolidation.
- MTEL pioneering solutions can be critical for MNOs cost-efficient RAN deployment, enhancing the appeal for MTEL's 22,607 sites in ex-Java.
- We maintain our Buy rating. We fine-tuned our FY24-26F estimates, but our DCF-based TP of Rp960 is unchanged.

**Resilient amid new telco M&A; potentially benefiting from ex-Java rollouts**  
We project ~7% yoy organic revenue growth for MTEL in FY24, aligned with its guidance (high-single-digit growth). This projection implies a sequential 4% qoq revenue uplift in 3Q and 4Q, driven by strong contributions from Telkom projects, TSEL, ISAT tenancies & FTTT. While we anticipate some earnings volatility within the sector due to the XL-SF merger, MTEL's revenue exposure to the two operators is relatively minimal, at 12%/3%, compared to its larger peers. Instead, we expect MTEL to capitalize on the post-merger potential, as we foresee rigorous rollouts in ex-Java.

#### MTEL's sites could prove critical for lower cost deployment by MNOs

Mitratel is fulfilling 82 new site orders in IKN, riding on the momentum trend in Kalimantan. It proactively introduces an antenna sharing solution in IKN, allowing MNOs to optimize their opex/capex resources when adopted at scale for 4G/5G. A McKinsey report suggests 30-40%+ savings when MNOs share the costs for their network equipment. Moreover, Mitratel extends its proposition with Starlink and HAPS systems, promising expanded coverage in remote areas. This could result in a 10-20% upside in new subs, in our view.

#### Appealing case for ROE expansion via inorganic growth

We assume lower interest costs for MTEL in FY24, driven by a reduced ND and a 7% interest rate (7.4% previously excl. M&A effects). As of 2Q24, MTEL maintains the lowest ND/EBITDA of 2.2x in the sector, is therefore well positioned to pursue small-scale acquisitions identified for FY24. We see potential upside for MTEL's ROE through increased leverage in these scenarios: a) the sale of IOH's fiber assets, b) Telkom's fiber portfolio optimizations among its subsidiaries.

#### Strong market position and undemanding valuation support our BUY rating

We maintain our Buy rating on MTEL on the potential ROE upside, resilient growth profile, and valuation upsides from interest rate cuts. We fine-tuned our FY24-26F estimates but our DCF-based TP of Rp960 is unchanged (implying 12.6x EV/EBITDA, inline with the sector median of 12.7x, vs. current 9.2x). IOH and XL-SF prolonged site relocations pose the main downside risks.

## Resilient Growth and Strategic Advantages Amid Telco Consolidation

### MTEL: Solidifying Industry Positioning

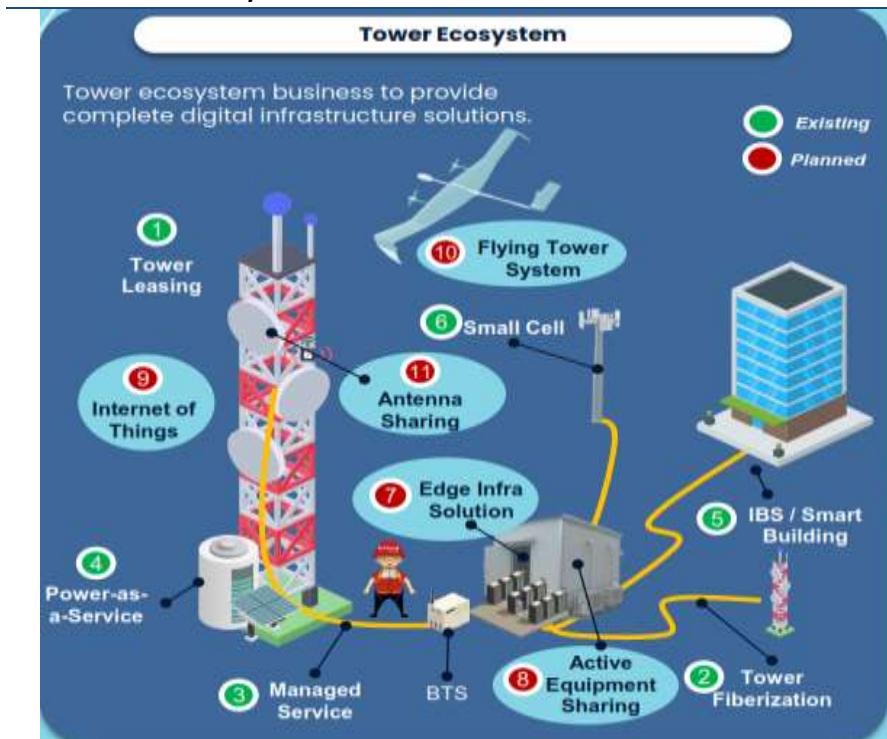

- Well-positioned for MNOs to seek larger coverage in ex-Java

We believe Mitratel continues to solidify its position as the preferred partner for mobile network operators (MNOs) seeking comprehensive and cost-effective coverage beyond Java. The company is delivering 82 site orders in the Nusantara Capital City (IKN), leveraging government initiatives to develop new infrastructure. Mitratel provides innovative solutions to extend internet access in remote areas lacking cellular coverage, utilizing Starlink's satellite bandwidth and HAPS systems, which offer lower latency. In their 2Q24 earnings calls, XL and IOH highlighted significant growth prospects outside Java. This expansion promises enhanced coverage in remote areas, potentially leading to a 10-20% increase in new subscribers (per Twimbit's projection of 21 million new internet users in rural areas by 2027) and a 15-25% reduction in churn.

- Proactive service offering for MNOs with new use cases for their future growth

MTEL is proactively adopting new use cases, such as antenna sharing (use case no. 11) and equipment sharing for Radio Access Networks (RAN) (use case no. 8), as shown in Exhibit 3. These initiatives allow mobile network operators (MNOs) to lease infrastructure rather than incur capital expenditures for radio transport. This approach aligns with the MNOs' strategy to outsource parts of their networks to infrastructure companies when deploying new coverage, particularly in remote areas beyond Java, with 4G and 5G.

**Exhibit 1. Tower Ecosystem for Mitratel**

Source: Company

**Exhibit 2. Non-Terrestrial Network Tech**

*Source: Company*
**Exhibit 3. IKN deployments**

**Program Overview**

- Mitratel is collaborating with Ibu Kota Negara (IKN) to build and expand telecommunications infrastructure in the new capital, securing a total of 82 site orders for the IKN development project.
- The core government area of KIPP 1A has secured a strategic total of 19 site orders.
- As of June, Mitratel has successfully delivered 15 RFI sites for KIPP 1A and 4 sites that are still waiting for the PUN process.

**Mitratel's Achievement**

**Project Highlight**

15 camouflaged tower in IKN successfully blends advanced technology with the natural surroundings.

Implementation of Glass Fiber Reinforced Polymer in site Soekarno Hatta KM2 Balikpapan (IKN Satellite City)

Implementation of weather sensors and air quality monitoring in Mitratel's IKN (Indonesian Capital) tower.
