Macro Strategy

Facing the Headwinds

- The conflation of reflation risk and the depreciation of key DXY basket currencies has sparked market volatility, necessitating caution.
- Various indicators point to strong U.S. economic resilience, which could decelerate the pace of Federal Funds Rate cuts.
- Indonesia's new government has introduced several novel initiatives focused on stimulating growth, though risks to execution remain.

The conflation of two risk factors. The recent surge in the U.S. Dollar Index (DXY) to >104 and the rise in U.S. Treasury yields can be largely attributed to the interplay of two main factors: reflation risk, which may slow the pace of rate cuts, and the depreciation of key DXY basket currencies, particularly the Euro and Canadian Dollar. Reflation risk is influenced by factors such as China's stimulus measures, escalating Israel-Iran tensions, the resilience of the U.S. economy, and increased odds of a Trump election win. On the currency front, the Euro, Canadian Dollar, and Yen-significant components of the DXY-have collectively depreciated by about 3.5% over the past month. Recent rate cuts by the European Central Bank (ECB) and the Bank of Canada (BoC) are underpinning such trend, with the BoC's recent notable 50 bps reduction signaling a pivot toward supporting growth following inflation control, and the ECB preparing for further cuts amid economic slowdowns in some EU countries. In our view, the current strength of the DXY is likely to be more constrained, particularly with the upcoming FOMC meeting scheduled for early November, where a rate cut is widely anticipated. This could balance out the playing field, potentially easing dollar strength and fostering currency balance. However, a hawkish stance by the Fed in Nov meeting could keep the USD elevated, raising the risk of increased IDR volatility and limiting Bank Indonesia's room for rate cuts.

US Economy: Indicators of Hard, Soft, and No Landing. The trajectory of U.S. economic growth remains balanced, complicating disinflation efforts, especially with external reflation risks in play. Multiple indicators suggest economic resilience that could slow the pace of Federal Funds Rate (FFR) cuts:

- 1. The Fed's recent Beige Book points to economic moderation without signs of contraction, with consumers continuing to spend despite high prices, bolstered by optimism around potential rate cuts. Although uncertainty remains high, contacts have expressed somewhat greater optimism about the long-term outlook. Many districts also reported low worker turnover, with limited layoffs (Exh. 2).
- The Atlanta Fed's GDPNow model recently raised growth forecasts to 3.4%, above the 3% consensus, reflecting U.S. economic resilience and supporting gradual rate cuts, provided this week's initial 3Q24 official U.S. GDP report confirms the trend.
- 3. The Dallas Fed's Weekly Economic Index, tracking weekly consumer and business activity, still shows positive growth year-to-date. However, recent data indicates some moderation, with the index falling to 1.69 as of October 19, down from a 21-month high of 2.66 in early July 2024.

As the U.S. election draws nearer, market sentiment is increasingly leaning toward a possible Trump victory, with Harris maintaining a slim lead in polls and electoral forecasts that either remain close or tilt toward Trump. A Trump administration is expected to expand the federal budget deficit more than a Harris administration, potentially impacting international relations and increasing future uncertainties. This rising deficit heightens fiscal dominance risk, as evidenced by the growing Treasury Term Premium on the 10-year U.S.

Treasury, along with an uptick in the 10-year Breakeven Inflation Rate (refer to Exhibit 6), necessitating caution.

The New Indonesian Government Initiatives. Several major policy initiatives have been announced, with the new government prioritizing growth stimulation. A key challenge lies in balancing the need to increase tax revenue without overly impacting consumption, while ensuring targeted spending on areas with high growth multipliers. The main proposals include a potential corporate tax reduction, adjustments to the goal of developing 3 million housing units annually, and a "whitening" policy to clear credit histories for repaid debts:

- Our analysis suggests that reducing the corporate tax rate from the current 22% to 20% could lower government revenue by up to IDR 50 trillion if not offset by other measures, potentially raising the fiscal deficit by 0.2 percentage points, from the budgeted 2.5% to 2.7% in 2025. However, this impact may be partly mitigated if businesses increase output, as lower tax costs could support the capital expenditure cycle, benefiting banking intermediaries and fostering job creation.
- 2. The housing initiative aims to develop 3mn units annually, with 2mn allocated to local developers to encourage balanced regional growth.
- 3. The debt "whitening" program seeks to clear negative credit records for 6mn debtors, including MSMEs, farmers, and fishers, allowing them renewed access to loans and potentially stimulating the lower-to-middle-income economy.

On the risk side, we note that rapid execution of the initial agenda may be slowed by changes in ministerial structures due to cabinet expansion. While early momentum is often anticipated within the administration's first 100 days, substantial progress could take longer unless these structural changes are finalized by year-end. On the "whitening" program, banks will still manage loan approvals and may adopt a more cautious, risk-averse approach if the policy extends to new loans, potentially slowing loan growth and increasing credit costs due to elevated risk.

Capital Market – Higher Yield and Currency Volatility. The 10-year U.S. Treasury yield rose to 4.25% by October 25, marking a 22 basis point weekly increase. Likewise, the 2-year U.S. Treasury yield grew by 16 basis points to 4.11%. The 10-year Indonesian Government Bond (INDOGB) yield also saw an uptick, climbing by 8 basis points to 6.75% last week. The U.S. Dollar Index advanced by 0.55% on a weekly basis, while the Indonesian Rupiah weakened by 1.13%, closing at IDR 15,640. Indonesia's 5-year Credit Default Swap (CDS) remained steady at 69 basis points as of the same date.

Fixed Income Flow – Continues foreign inflows, while Banks reduce position. Despite recent volatility, foreign investment in domestic Government Securities (SBN) experienced a slight inflow of IDR0.04tn last week (as of 24 Oct), bringing total foreign holdings to IDR 889tn. Month-todate (MTD), foreign inflows reached IDR18.78tn. With still robust foreign demand, the banking sector continues to reduce position with weekly outflow of IDR5.48tn, contributing to a larger MTD outflow of IDR33.16tn. Bank Indonesia (excluding Repo transactions) reported a weekly inflow of IDR4.72 tn, though MTD figures showed a marginal outflow of IDR0.37tn. Mutual funds recorded a weekly inflow of IDR1.23tn, while the insurance and pension fund sectors observed inflows of IDR3.33tn.

Government Securities (SUN) Auction Plan: October 29, 2024

The government will conduct an auction of Government Securities (SUN) on Tuesday, October 29, 2024. The series that will be offered at this auction are SPN03250129 (New Issuance), SPN12251030 (New Issuance), FR0104 (Reopening), FRSDG001 (Reopening), FR0103, (Reopening), FR0098 (Reopening), FR0097 (Reopening) and FR0105 (Reopening). Then in this auction the Government provided a target of IDR22 trillion, with a maximum target of IDR33 trillion.

The results of the Government Securities auction on October 15 showed a total incoming bid of IDR 44.27 trillion, higher than the previous auction on October 1, 2024 of IDR 46.65 trillion. The series that has the largest incoming bid is the FR0103 series with a yield range of 6.67% - 6.81% with incoming bids reaching IDR 15.21 trillion and followed by FR0104 and SPN12251002 which attracted bids of IDR 12.08 trillion and IDR 5.02 trillion respectively with a yield range of 6.38% - 6.52% for the FR0104 series and the SPN12251002 series has a yield range of 6.10% - 6.30%. Meanwhile, the nominal won in this auction amounted to IDR 25 trillion, higher than the government's target of IDR 22 trillion and also the previous auction of IDR 24 trillion. Thus the bid-to-cover ratio of this auction is 1.77x. (DJPPR)

US GDP Growth q-q, annualized - 3Q24 (Wednesday)

Market expect the US GDP will grow at same rate as last quarter at 3.00% in 3Q24. This growth is attributed to increased after-tax income, higher savings among households, and robust labor market that continues to support consumption

Exhibit 10. US GDP Growth

US JOLT's Job Openings & Quits - September 2024 (Tuesday)

US JOLT's Job Openings is expected to reach 7.99 mn in Sep-24, lower than last month of 8.04 mn. The anticipated decrease in job openings may signal a cooling labor market, potentially leading to considerations for lowering interest rates to stimulate growth. On the other hand, US JOLT's Job Quits is expected to reach 3.00 mn in Sep-24, also lower than last month of 3.08 mn.

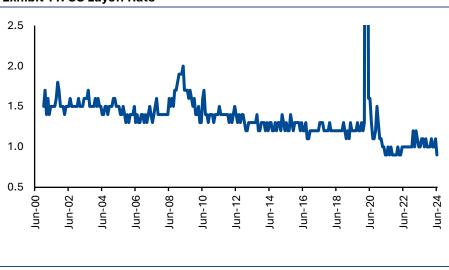

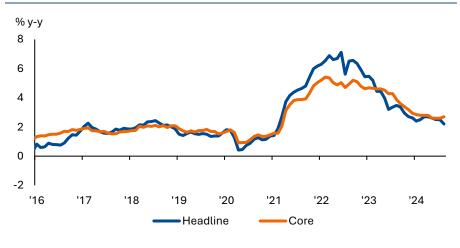

Exhibit 11. US Layoff Rate

Source: Bloomberg

US PCE - September 2024 (Thursday)

US PCE is forecasted to increased by 2.10% y-y in Sep-24, slightly lower than previous month of 2.20%. Meanwhile, Core PCE is forecasted to remain the same as previous month of 2.70% y-y in Sep-24. This ongoing trend suggests a gradual easing of inflationary pressures, which has implications for monetary policy decisions by the Fed.

Exhibit 12. US Personal Consumption Expenditure

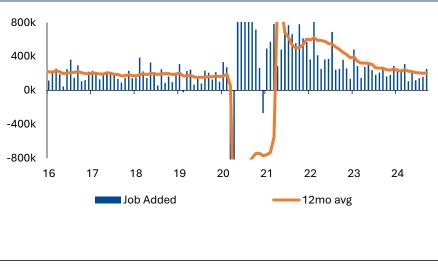

Monday, 28 October 2024

US Non-Farm Payrolls - October 2024 (Friday)

Market expect the US Non-Farm Payrolls to rose by 140K in Sep-24, much lower than last month of 254K. Simultaneously, the unemployment rate is expected to remain the same as previous month of 4.10%. The labor market appears resilient, with strong job additions across various sectors and a stable unemployment rate. This implies strong economic conditions until the end of 2024.

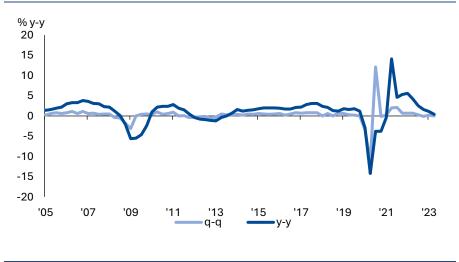

Source: Bloomberg

Eurozone GDP Growth y-y - 3Q24 (Wednesday)

Eurozone's GDP growth is projected to show a y-y increase of 0.8% in 3Q24, follows a 0.6% growth rate reported for 2Q24. It was driven by government spending and exports, despite household consumption showing some weakness and investment remains a concern due to ongoing economic pressures.

Monday, 28 October 2024

Eurozone Inflation - October 2024 (Flash) (Thursday)

In Oct-24, Eurozone inflation is expected to reach 1.90% y-y. This figure represents an increase from 1.70% y-y in Sep-24 but still below the ECB target of 2.00%. The ongoing decline in inflation strengthens the case for potential interest rate cuts by the ECB.

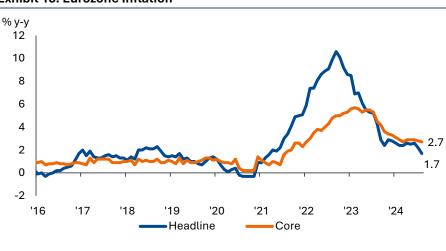

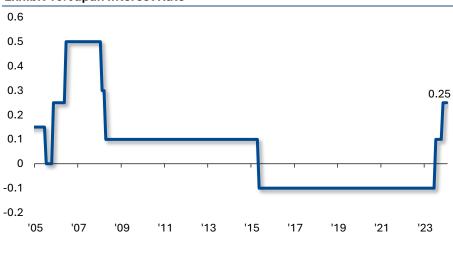

Exhibit 15. Eurozone Inflation

Japan Interest Rate - October 2024 (Thursday)

Market expect the Japan Interest Rate will remain at its highest level since 2008 of 0.25% in Oct-24, this mark the 4th consecutive month of high interest rate for Japan. This reflects the BoJ's cautious approach to normalizing its monetary policy after years of ultra-low rates.

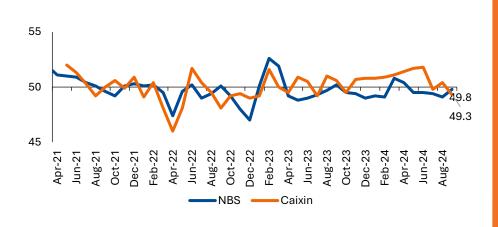

China NBS Manufacturing PMI - October 2024 (Thursday)

China NBS Manufacturing PMI is expected to reach 50.10 in Oct-24, higher than previous month of 49.80. This improvement is due to ongoing economic stabilization efforts by Chinese authorities.

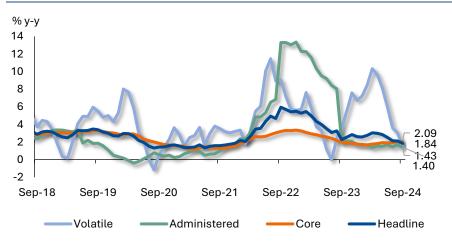

Source: Bloomberg

Indonesia Inflation - October 2024 (Friday)

Market projected the Indonesia Inflation to reach 1.70% y-y in Oct-24, lower than last month of 1.84%. It could be driven by decreases in volatile food prices and government-regulated prices, particularly fuel. Meanwhile, inflation is projected at 0.00% m-m in Oct-24, improving from last month's deflation of 0.12%.

Chinese bank cut the benchmark lending on 1Y Loan Prime Rate (LPR)

to 3.10% from 3.35% and the 5Y LPR to 3.60% from 3.85%. The cut followed PBoC move of reducing 1Y Medium-Term Lending Facility Rate to 2% in late-September, which expected to spur loan disbursement and reduce interest expense by the customers.

China's PBoC left the 1-year Medium-term Lending Facility rate unchanged at 2.0% in Oct-24,

following a 30bps rate cut in Sep-24. The central bank also drained CNY89bn in net basis.

China's Industrial Profit declined by 27.1% y-y in Sep-24,

faster than Aug's plunge of 17.8% y-y, as deflationary pressure, especially for the factory gate prices, put pressure on corporate finance. For the first nine months in 2024, Industrial Profit contracted by 3.5% y-y.

IMF upgraded US GDP Growth in 2024 to 2.8% y-y,

0.2 p.p higher than July's forecast, citing the resilient consumer spending and residential investment. Meanwhile, IMF downgraded China's growth outlook in 2024 to 4.8% from July's 5% due to persistent weakness in the real estate sector and low consumer confidence. The IMF noted that the recent policy in China might provide an upside risk to near-term growth.
